

## Fast and compact: Metabo presents the new cordless impact driver

- Working speed adjustable at 12 levels
- High performance with brushless motor
- Compact design makes operation easier

There is no real competition in terms of efficiency for the new cordless impact driver SSD 18 LTX 200 BL from Metabo: Compared to the predecessor, the small power pack manages up to 34 percent more screws per battery pack charge. With one 18V LiHD 4.0 Ah battery pack, this translates into around 525 screws 5x60 in one medium-dense wood fibreboard – and this with an overall length of only 129 millimeters. This is possible thanks to the particularly powerful brushless motor. This makes the SSD 18 LTX 200 BL one of the smallest and fastest impact drivers in its class.

### Fast enough for any application

Using a thumbwheel, you can choose from twelve levels of speed and torque up to a maximum of 200 Newton metres for any application. With the brushless motor, the SSD 18 LTX 200 BL has plenty of power despite the compact size. This permits the impact driver to drive screws into soft wood with a diameter of 8 and a length of 300 millimeters. Tightening and loosening of metric screws or the driving in of concrete screws is no problem. Compared to a standard drill/screwdriver, the impact driver with hexagon socket holder has almost no reverse torque. therefore you can work single handed for prolonged periods in repetitive applications with minimum user fatigue.

### Turning without overtightening

A special function for self-drilling screws is the Automatic Power Shift (APS) that can be selected using a thumbwheel. With APS, the tip of a self-drilling screw turns itself very quickly into the material in the beginning with high speed. After drilling, the machine automatically reduces torque and speed, thus preventing the risk of overtightening the thread.

### Can be combined in a variety of ways

The SSD 18 LTX 200 BL can be operated with all 18 Volt slide-on style battery packs. The new impact driver is part of the Pick+Mix system from Metabo and can be combined with more than 85 Metabo machines, chargers, battery packs and accessories of the 18 Volt class.

### Technical data

Bit retainer	¼" hexagon socket (6.35 mm)
Voltage	18 V
Capacity	4.0 Ah / 5.5 Ah
Speed and torque levels	12
No-load speed	0 - 2,900
Maximum torque	200 Nm
Maximum impact rate	4,000
Weight with	
2.0 Ah Li-ion	1.3 kg
4.0 Ah LiHD	1.4 kg
5.5 Ah	1.6 kg
Overall length	129 mm
