

## Rivet in just seconds with the new Cordless blind rivet gun by Metabo

- **Extremely fast, comparable to compressed air devices**
- **Powerful and long service life thanks to brushless motor and robust precision drive**
- **The first cordless rivet gun compatible with an overall 18 volt system**

Metabo now offers a riveting option. The new cordless blind rivet gun sets rivets in just seconds. The NP 18 LTX BL 5.0 only takes roughly one second per rivet. That makes Metabo's cordless rivet gun twice as fast as other comparable tools on the market, and helps it easily keep up with compressed air devices. In contrast to compressed air tools, however, you won't have to deal with any hoses. Prepare and attach panels – with this additional product, Metabo covers standard panel finishing processes in the 18 volt class; the NP 18 LTX BL 5.0 is the first cordless rivet gun on the market compatible with a full system of 18 volt machines.

### Safe investment

The extremely quick setting process increases productivity and work progress significantly. "Thanks to the brushless motor and the robust precision drive, the cordless rivet gun isn't just unbeatably fast, but also extremely long lasting" explains Product Manager Michael Karrer. "That makes the cordless rivet gun a safe investment that will last a long time. It's not just the machine that stands up to a long service life – so do the riveted connections, for instance in railing construction, on pipelines in ventilation and air conditioning work, or in container and housing construction. "Riveted connections are especially practical because they are fast and inexpensive", says Michael Karrer.

### One device for every application

Integrated retainer mouth pieces hold the rivet in any position, meaning it can't fall out while you're working, no matter what position you hold the device in. A robust hand protection bar with integrated mouthpiece storage offers additional security. Once the transparent collection container attached to the back is full, the user sees this immediately and can dispose of remaining rivet mandrels. The tool is also integrated into the collection container to exchange the mouthpiece as needed. Metabo's cordless rivet gun handles any rivet material – such as aluminium, steel, and stainless steel – up to a diameter of five millimetres.

## Systematic riveting

Along with the BE 18 LTX 6 cordless drill, the NP 18 LTX BL 5.0 by Metabo covers the sheet metal working process within the 18 volt class: From preparation to riveted attachment. The Metabo Pick+Mix system offers more than 85 compatible 18 volt class devices that can be combined any way you need.

## Technical data

|                   | NP 18 LTX BL 5.0                 |
|-------------------|----------------------------------|
| Rivet diameter    | 2.4 - 5.0 mm                     |
| Rivet materials   | All (up to Ø 5.0 mm)             |
| Tensile force     | 10,000 N                         |
| Device travel     | 25mm                             |
| Weight            | 1.8 kg                           |
| (without battery) | Brushless                        |
| Motor             | 18 V                             |
| Volt class        | all Metabo 18 volt battery packs |

The new NP 18 LTX BL 5.0 cordless blind rivet gun by Metabo sets a rivet in around a second: "Thanks to the brushless motor and robust precision drive, the cordless rivet gun isn't just unbeatably fast, it's also especially long-lasting", says Product Manager Michael Karrer. Photo: Metabo

**Practical feature:** Integrated retainer mouthpiece holds the rivet in any position; this means it can't fall out while you're working, no matter what position the device is held in.
