

INFINITY TIG 225

the Elements range widens to TIG

Infinity TIG 225 is the new TIG inverter welding machine, with high frequency HF or LIFT striking that allows pulse welding (PULSE). Ready to use with TIG welding accessories, it is ideal for welding various types of materials, such as steel, stainless steel, titanium, copper, nickel and their alloys. Infinity TIG 225 turns into an MMA electrode welding machine as well to meet the most wide-ranging operating needs.

LCD PANEL

The LCD panel is easy to read, even in poor lighting, and allows clear display of the TIG welding curve to facilitate adjustment of multiple parameters, including:

- . start current
- . frequency
- . pulse balance
- . adjustment of spot welding
- . times starting from 10ms.

EASY PULSE

The EASY PULSE function automatically sets the various current and pulse times adjustments, making it an essential function for a first quick setting and for less expert users.

REMOTE CONTROL

The remote control connection enables use and adjustment of the machine also when working far from the generator.

FINDER FUNCTION

The FINDER function is an useful support to complete works in a quick and precise way. It facilitates arc striking at the lowest currents and the subsequent positioning of the torch to the advantage of greater welding precision.

MMA

By changing the accessories, it becomes an electrode welding machine able to guarantee excellent results thanks to adjustment of the arc force, hot start and anti-stick devices.

The VDR device, which reduces output voltage when the welding machine is on but not in use, makes the product much safer for the operator.

TIG OPTIONAL ACCESSORIES

Bolas, S.A.

Rua Sebastião Mendes Bolas, nº 7, Zona Industrial de Almeirim Norte - 7005-872 ÉVORA
