

VISION 180

Panoramic viewing area for the welding mask by true colors

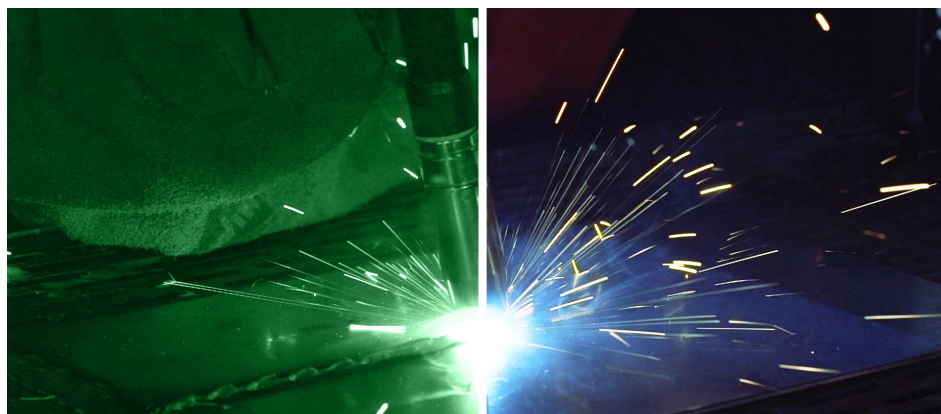

“PANORAMIC” 180° VIEWING AREA

The 180° viewing area increases the operator’s visibility during work by improving comfort in every welding position.

TRUE COLOR TECHNOLOGY

Makes colour perception realistic even during the welding phases. Realer colours, cleaner contrasts and better definition of the image for more precise welding.

WITHOUT TRUE COLOR TECHNOLOGY

WITH TRUE COLOR TECHNOLOGY

VISION 180

Panoramic viewing area for the welding mask by true colors

IDEAL FOR ALL WELDING PROCESSES

MMA, MIG-MAG and TIG welding starting with >2A

OPTICAL CLASS 1/1/1/1

Perfect, distortion-free visibility for a clear vision of the work area.

DELAY AND SENSITIVITY ADJUSTMENTS

Delay adjustment of dark/light passage and sensitivity can be carried out quickly, directly on the small panel placed outside the mask.

GRINDING

Having selected the grinding function, the mask guarantees complete protection as well as a 180° viewing area.
