Brushless cordless drill/screwdriver, cordless hammer drill

Fast and handy: Metabo presents its first brushless cordless drill/screwdriver in the compact class

- . **Brushless motor**
- . **Compact and ergonomic design**
- . **High working speed**

Fast drilling and screwdriving, plenty of endurance and a compact design – this is what the new cordless drill/screwdriver BS 18 L BL Quick from Metabo stands for. New is above all the motor: Brushless is the motto here. “Brushless motors are small, fast and enduring. They make power tools significantly more compact and more resilient at the same time”, explains product manager Jens Förster. “The trend is clear: Brushless technology is developing more and more to the market standard. Therefore, Metabo offers now with the new BS 18 L BL Quick brushless cordless drills/screwdrivers in all performance classes.”

Without drill chuck, the BS 18 L BL Quick is just about 103 millimetres long and thus the shortest drill/screwdriver in its class on the market. Therefore it is ideally suited for all applications in confined spaces. Light drilling and screwdriving jobs are done quickly, the BS 18 L BL Quick, for example, manages bores with up to 32 millimetres in diameter in soft wood and with up to 13 millimetres in diameter in steel.

Whether for short or time-intensive jobs: With its slim and ergonomically shaped handle, the BS 18 L BL Quick always lies comfortable in the hand for any application. Optionally, Metabo also offers the new brushless drill/screwdriver with the same performance data also as BS 18 L BL with fixed drill chuck without Quick system and as impact driver SB 18 L BL.

Versatile use, fully compatible

The integrated Quick system equips the new drill/screwdriver with versatile applications, since bit retainer and accessories can be replaced within a matter of seconds. Craftsmen change between drilling and screwdriving without any tools and using a simple procedure. Metabo delivers the BS 18 L BL Quick as standard in a plastic carry case with two 2.0 or also 4.0-Ah battery packs and matching charger. However, the machine also takes all other Metabo battery packs of the 18 volt class that are also compatible with machines of other manufacturers. Metabo is part of the Cordless Alliance System (CAS). Within CAS more than 120 machines of different manufacturers are one hundred percent compatible and can be combined at random using only one battery pack.

Small, fast and enduring: With brushless motor, the cordless drill/screwdriver BS 18 L BL Quick from Metabo is more compact and durable at the same time. Metabo offers the new brushless drill/screwdriver also as BS 18 L BL with fixed chuck without Quick-System and as drill/screwdriver SB 18 L BL.

Technical Data	BS 18 L BL / BS 18 L BL Q / SB 18 L BL
Battery pack voltage	18 Volt
Battery pack capacity	2.0 Ah
No-load speed	0-550 / 0-1,850 rpm
Maximum torque soft / hard	25 Nm / 60 Nm
Max. drill diameter in soft wood / steel	32 mm / 13 mm
