

## RM 36-18 LTX BL 46 and FSB/FSD 36-18 LTX BL 40

Mowing and trimming. New cordless lawn mower and cordless brush cutter from Metabo

- **Three-in-one lawn mower: mowing, collecting and mulching**
- **Efficient mowing of large areas up to 800 m<sup>2</sup>**
- **Powerful brush cutter for any application**

Well-kept green spaces without cable - this is now available thanks to the powerful battery packs from Metabo. The new garden range of the Nuertingen power tool manufacturer starts into the garden season, among other things, with a lawn mower for large areas and two brush cutters for demanding applications. "Our new range covers the most important applications in gardening and landscaping, thus tools for the professional care of lawns and green areas must not be missing", says Metabo product manager Carina Frank.

The new powerful lawn mower RM 36-18 LTX BL 46 from Metabo is particularly suited for large areas up to 800 square metres.

### Efficient on large areas

The new 18 Volt cordless lawn mower RM 36-18 LTX BL 46 is a real multi-talent: Users cannot only use it for mowing and ejecting the cut grass straight towards the rear, but also collect and mulch it if needed. The supplied flexible collection bag and the mulching key can be easily changed for this. "Our new lawn mower is particularly suited for large areas of up to 800 square metres and processes them very efficiently", says Carina. The powerful Brushless motor and the 46 centimetre wide cutting deck ensure high cutting output. "At the same time, the battery pack endures long working periods, since the mower works in an intelligent and energy-efficient manner: It adapts the motor output to the grass height", explains Carina. Users can set the cutting height with one hand to seven different levels.

Thanks to the low noise with a sound pressure level of 88 decibel (A-rating), even jobs in areas sensitive to noise are possible. In order to transport the powerful mower easily to the application site, it comes with a double foldable handle and additional carry handles. It can also be stored upright and thus occupies little space.

Plenty of power, compact packaging: The RM 36-18 LTX BL 46 can be easily folded and even stored upright for easy transport and space-saving storage.

### Powerful cuts for demanding applications

If the lawn mower meets its limit due to undergrowth, obstacles or due to working on slopes, the new powerful 18 Volt cordless brush cutters FSB 36-18 LTX BL 40 with bike handle and FSD 36-18 LTX BL 40 with loop handle is used. Whether trimming tall grass, cutting thorn hedges or trimming lawn edges, the brush cutters deliver plenty of power with their Brushless motor and 40 centimetres of cutting diameter, even for demanding applications.

The adjustable bike handle is particularly suited for comfortable working on larger areas and can be adjusted to the body height. "On the other hand, thanks to the loop handle, users can work efficiently even in tight spaces and on obstacles. The stepless speed control trigger allows the user to adjust the working speed to the respective application", says Carina Frank.

### Comfortable to work with

The different tools provide even more flexibility: a twin line spool for mowing large lawn areas and different blades for thick brush or undergrowth. The line can be adjusted and changed by the user during operation by tapping it briefly, quickly and without having to remove or open the spool. The scope of delivery of both tools includes an individually adjustable shoulder and back carry strap, which ensures a healthy body posture by optimally balancing the working weight. Just like the lawn mower, the quiet brush cutters can be used in environments sensitive to noise.

All three tools expand the 18 Volt class from Metabo and the cross-manufacturer battery pack system CAS (Cordless Alliance System), in which presently more than 230 tools of 23 brands are compatible with one battery pack. For the users this means that they can use one battery pack not only in the garden, but also for their other power tools.

Powerful cuts even for demanding applications thanks to the new brush cutter FSB 36-18 LTX BL 40.

Quickly and without tools: Users change the line in the Metabo brush cutters FSB 36-18 LTX BL 40 and FSD 36-18 LTX BL 40 without opening or having to remove the spool.

### Technical data

	<b>Lawn mower RM 36-18 LTX BL 46</b>
Battery pack voltage	18 V
Cutting width	46 cm
Cutting height	25 – 80 mm
Cutting height levels	7
No-load speed	2.800 /min
Maximum speed	3.400 /min
Weight with battery pack	25.8 kg

Three-in-one: The RM 36-18 LTX BL 46 cannot only mow, but also collect and mulch. The flexible collection bag and the mulching key can be easily changed.

	<b>Brush cutter FSB 36-18 LTX BL 40</b>	<b>Brush cutter FSD 36-18 LTX BL 40</b>
Battery pack voltage	18 V	
Cutting diameter	40 cm	
No-load speed	0 - 6,000 /min	
Thread diameter	2 mm	
Handle	Bike handle	Loop handle
Weight with battery pack	4.7 kg	4.3 kg

The new Metabo brush cutters are available as FSB 36-18 LTX BL 40 with bike handle for comfortable working on larger areas and as FSD 36-18 LTX BL 40 with loop handle for tight spaces.
