

SSW 18 LTX 1750 BL

Versatile power pack: New cordless impact wrench from Metabo

- **Extremely powerful for demanding screwdriving applications**
- **Automatic-Power-Shift: Support in loosening nuts and screws**
- **Twelve speed/torque levels for a wide range of applications**

The new cordless impact wrench SSW 18 LTX 1750 BL from Metabo is an absolute specialist in terms of performance: The cordless impact wrench with $\frac{3}{4}$ "-spindle manages up to 1,750 Newton metres when tightening and up to 2,100 Newton metres when loosening screws. Thanks to this high torque it is extremely powerful. "Our new impact wrench is one of the most powerful ones in its class. Professional users can use it in very different ways.

In principle for all applications, where an extremely high torque is required, for example in steel or bridge construction or for the maintenance and servicing of construction and commercial vehicles. This makes the impact wrench the optimal machine for demanding tightening applications of all kinds", explains Metabo product manager Felix Kaiser.

Powerful and efficient

The new cordless impact wrench is a real power pack and has a brushless motor that ensures quick work progress and highest efficiency whenever used. "Whether it is for servicing large wheel loaders, repairs of agricultural machines or for maintenance applications in the industrial sector, our new impact wrench delivers on its promises and handles metric screws up to M33", explains Kaiser.

If the APS mode (Automatic Power Shift) mode is set, the automatic power shift APS reduces the speed as soon as the screw or nut is loosened. This minimises the risk of them falling and injuring the user or causing damage.

Versatile and safe

Depending on the task, professional users can set the speed and torque in twelve stages. “This makes our impact wrench suited for the most varied application areas. In addition, we have equipped our new cordless impact wrench with a safety bar. Users can attach the matching tool safety belt here and secure their tools”, explains Kaiser and sums up: “All in all, our new machine is powerful, efficient, safe and versatile. It makes work easier for professionals in many ways.”

The new cordless impact wrench complements the Metabo 18 Volt system and the cross-brand battery pack alliance CAS (Cordless Alliance System) with an additional powerful tool.

Within CAS, currently more than 300 machines from more than 30 different manufacturers are compatible with one battery pack and can be combined at will.

Technical data

	SSW 18 LTX 1750 BL
Battery pack voltage	18 V
Battery pack capacity	2 x 5.5 Ah
Max. screw size	M33
Max. no-load speed	1,650/min
Maximum impact rate	2,450/min
Maximum torque	1,750 Nm
Max. loosening torque	2,100 Nm
Speed/torque levels	12
Bit retainer	Male square $\frac{3}{4}$ " (19 mm)
Weight (without battery pack)	3.0 kg

Delivers on its promises: The cordless impact wrench handles screws up to M33 and is suited for the most diverse jobs on construction vehicles. Photo: Metabo
