

EQUIPMENT FOR CLEANING SPORTS CENTERS AND PADEL FIELDS

The cleaning of sports centers is a fundamental aspect to ensure the safety of the people who attend them and to keep the facilities in good condition.

For this reason, more and more facilities are investing in specific machines for cleaning:

- floors
- walls
- surfaces
- sport equipment

The use of specific machines for cleaning sports centers offers numerous advantages.

Firstly, it saves time and effort compared to manual cleaning. Furthermore, the machines are designed to clean effectively and delicately, without damaging the materials of the sports equipment or the playing field.

In recent years, great attention has been paid to cleaning the padel courts. With the widespread diffusion of this sport in Europe and in particular in Italy, the need has arisen to identify new solutions and technologies for cleaning and maintaining pitches, which are particularly exposed to dust and dirt due to their use outdoors and the presence of sand on the playing surface.

For this reason, padel court cleaning machines are designed to effectively remove dirt and sand without damaging the pitch. BIEMMEDUE meets the needs of all sports facility managers, with the design and production of solutions and products capable of satisfying the demands and needs of each sport, with particular attention to the world of Padel.

EQUIPMENT FOR CLEANING SPORTS CENTERS AND PADEL FIELDS

Cleaning sports centers and padel courts

BIEMMEDUE sweeper compact size enables it to pass through pedestrian doors and access the synthetic turfs for daily cleaning, also suctioning the dust generated by the residues left by the little balls, which are extremely HARMFUL to athletes' health. Thanks to a special system, the sweeper swe-eps and evenly spreads the sand built up at the border edges of the areas on which athletes step on most often during the game.

Sanitization of sports centers and padel courts

Sports centers in general are training places where the presence of viruses and bacteria is very high and can pose a serious risk to the health of the athletes and sportsmen who attend them.

It is therefore necessary not only to thoroughly clean these environments, but also to sterilize and sanitize them daily to ensure that they are always healthy and safe for those who train.

With the use of saturated dry steam up to a temperature of 190° it is possible to make every space completely sterilised and sanitized, as well as destroying any type of pathogenic agent present in the environment.

BIEMMEDUE SPA steam generators do not require the use of chemical detergents resulting in a natural method of deep cleaning that eliminates toxic and chemical bonds between the work surfaces and dirt without having to resort to chemical solvents and/or detergents.

The treatment thus becomes essential to eliminate 99% of any form of mite, virus or bacterium guilty of disease in the body and completely sanitizes every tool, tool and surface: benches, weights, dumbbells, machinery, changing rooms, corridors, showers, etc.

EQUIPMENT FOR CLEANING SPORTS CENTERS AND PADEL FIELDS

Dehumidification of sports centers and

BIEMMEDUE DR dehumidifiers for humidity control in indoor applications, are the result of a demanding design study focused on performance, quality, robustness and reliability. Thanks to the stain-resistant rubber wheels and the rear extensible handle it is possible to move the dehumidifier from one environment to another in a simple and practical way.

Heating sports centers and padel courts

The buildings realized for sports activities can also be used for different needs. It's necessary a project of flexible-use heaters to warm up those areas due to their vastity. The ideal heating system to use for those substantial areas, attended everyday by numerous people, would be the system "plug and play" which guarantees energy saving.

Biemmedue spa has considered the previously mentioned characteristics to make some studies and design a line of mobile forced air space heaters realized to heat up pressostatic covers, bearing roofs of tennis structures, padel, gyms, swimming pools etc.
