

## AS 18 L PC COMPACT | AS 18 HEPA PC COMPACT

New cordless vacuum cleaners from Metabo: ideal for dust and water

- Compact and light cordless wet/dry vacuum cleaners
- Filter cleaning PressClean at the touch of a button
- Eco mode for longer battery pack runtime, boost mode for maximum performance

The two new cordless vacuum cleaners AS 18 L PC Compact and AS 18 HEPA PC Compact from Metabo take care of cleaning and extraction jobs in a clean and reliable manner, for fine dust, coarse dirt or also small water quantities.

The AS 18 L PC Compact has dust class L for slightly hazardous dust like domestic dust, gypsum or chalk.

The new AS 18 HEPA PC Compact with its HEPA filter is suited especially for people suffering from allergies, since it additionally reduces the likeliness of domestic dust, pollen, allergens and mites. “Both machines are small and compact, and the best of it: They are cordless. Users can use the vacuum cleaners for mobile applications in wet and dry mode and are at the same time ideally protected from dust with occupational exposure limits greater than 1 mg/m<sup>3</sup>”, explains Metabo product manager Sebastian Koch.

### Clean filter at the touch of a button, flexible extraction power

Both machines have integrated filter cleaning: If the filter clogs with dust after longer periods of working, it can be easily cleaned at the touch of a button.

In addition, Metabo offers matching fleece filter bags. These can be used to safely collect even fine dust and to dispose of it in a clean and easy manner.

Depending on the application, you can flexibly change between eco mode for longer runtime per battery pack charge and the boost mode for maximum extraction performance. “If the user works for example on smooth surfaces such as parquet floors, the eco setting is sufficient. Like this he can make full use of the battery pack energy and work for longer overall”, says Koch. “If more extraction power is needed, one can quickly switch to boost mode.” A sealing cap on the vacuum cleaner protects the battery pack from dust and wetness.

## For corners and edges

With the suction and crevice nozzle included in the scope of delivery, the vacuum cleaner is particularly suited for minor cleaning work. “Sometimes, however, even the crevice nozzle is too big for particularly narrow gaps. This is where the blowing function comes in”, says Koch. With the blowing function, professional users can simply blow out coarse wood shavings.

Thanks to a stretch suction hose that can be extended up to 2.5 metres, any corner can be reached with the vacuum cleaner. After completion of the work, the hose is quickly stored again on the vacuum cleaner for compact storage. The three-piece pipe system included in the scope of delivery can also be stored on the vacuum cleaner occupying little space. Thanks to the integrated carry strap, the user can simply transport the vacuum cleaner or carry it on his shoulders when using together with power tools. “The two new cordless vacuum cleaners are small and compact and bring everything along what a professional needs for smaller cleaning and extraction jobs, including filter cleaning. All in all: Reliable companions for fast jobs in the workshop or on the construction site. And if you need even more power, why not use our cordless vacuum cleaner 36-18 BL 25 M SC, resulting in a well-rounded system”, sums up Koch.
