

HPE PURE WATER CLEANING SYSTEM

The eco-friendly solution

IPC HighPure HPE technology achieves excellent cleaning results without the use of detergents. With its exclusive four-stage water purification system, the pure water performs as a unique solvent making HPE ideal for cleaning surfaces such as windows, aluminium, marble and solar panels.

Complete with telescopic or modular extension poles, the system allows the operator to clean comfortably and safely at heights of up 15-20 meters from the ground.

PURE EFFICIENCY

With 8 bar pressure and 420 l/h water flow the HPE system decreases cleaning time up to 75%, allowing the operator to clean over 200 m² in just one hour with sensible savings on labour costs.

8 bar - 420 l/h
8 bar - 420 l/h

THE PERFECT MATCH

The HPE's purified water system combined with the PW-C40 cold water high pressure washer supplies pure water with 100 bar pressure and 300 l/h water flow, guaranteeing top performances and perfect cleaning results, even on the hard to reach surfaces.
