

CORDLESS PRUNING SAW MS 18 LTX 15

Compact, safe and versatile: The new cordless pruning saw from Metabo

- **Compact and powerful**
- **Simple and safe application**
- **In combination with the telescopic handle, the pruning saw tackles tree cuts also high up**

Metabo expands its range of motor saws with a new powerful cordless pruning saw. The MS 18 LTX 15 is ideal for cutting back trees and shrubs as well as for cuttings. Whether it is used in gardening and landscaping or for private users: The compact tool with a weight of only 1.6 kilograms (without battery pack) has a useful cutting length of 15 centimetres.

“Cutting back shrubs and tress with a commercial pruning saw or pruning shears often requires a lot of time and effort. The MS 18 LTX 15 remedies this situation. Our cordless pruning saw is like a mini chain saw that fits well in the hand and can be operated easily and safely be anyone”, says product manager Ines Unterkircher and adds: „With the new cordless pruning saw, we broaden our garden range evne more. We offer the right cordless tools for numerous applications, from lawn care and irrigation and drainage to caring for trees and shrubs.“

Compact, yet powerful

With a fully charged 18 Volt battery pack (2.0 ampere hours), the MS 18 LTX 15 makes up to 60 powerful cuts in hardwood with a diameter of 80 millimetres. It has a consistently high chain speed of five metres per second and ensures fast work progress and a clean cutting pattern even under load. Thanks to the quick closure and the tensioning tool, which is always stowed within easy reach in the housing, users can easily change and tension the saw chain. The ergonomic design enables uncomplicated handling and the rubberised grip areas provide extra safety.

“In order to make the pruning saw as light and compact as possible, we have dispensed with an integrated oil tank. This would lead to a greater top-heavy weight. The organic sawing chain lubrication oil supplied in a practical dosing bottle allows the oil to be applied directly to the chain before starting work within a few seconds,” Unterkircher explains.

CORDLESS PRUNING SAW MS 18 LTX 15

Compact, safe and versatile: The new cordless pruning saw from Metabo

Safe and flexible

Our users' safety is top priority to us. We therefore equipped the saw with a guard, a grip protection and a safety switch against unintentional starting. Our low kickback 1/4" saw chain also ensures low vibrations and safe cuts", Unterkirchner stresses.

Using the MS telescopic handle, which is available as accessory and can be extended from 120 to 180 centimetres, users can use the new cordless pruning saw like a pole pruner for cutting trees at a height in a matter of seconds. To this end, simply fix the saw on the slide-on connection and secure with the screw.

The cordless pruning saw is part of Metabo's 18 Volt system and complements the cross-brand cordless alliance CAS (Cordless Alliance System). Currently, within CAS, more than 300 tools from more than 30 different manufacturers are compatible with one battery pack and can be combined at will.

Technical data

	MS 18 LTX 15
Battery pack voltage	18 V
Max chain speed	5 m/s
Cutting length	15 cm
Drive link thickness	1.1 mm
Saw chain tooth pitch	1.4"
Weight with / without battery pack	1.6 / 2 kg

Safe: Thanks to the guard, the grip protection and the safety switch against unintentional startup, it is particularly safe. The MS 18 LTX 15 makes up to 60 cuts in hardwood with 80 mm diameter with one battery pack charge (18 V / 2.0 Ah).
