

NEW MULTILIGHT CONNECT

The flexible solution for all your lighting needs.

Finally, we are thrilled to reveal our latest addition to the SCANGRIP CONNECT product family, the brand-new MULTILIGHT CONNECT, compatible directly with METABO/CAS 18 V battery system and all other 18 V/20 V battery packs from leading power tool brands by using a CONNECTOR.

Perfect for all needs

This innovative hand-held work light offers a flexible solution for all your lighting needs with its multiple, exchangeable light heads. The concept behind MULTILIGHT CONNECT is to combine a basic handle, similar to those found on power tools, with a range of different light heads that can be easily exchanged to meet the demands of different applications. With the MULTILIGHT CONNECT, you have the freedom to choose and tailor the perfect work light solution for your needs.

Different light heads for every job

We offer three different light heads – that is SEARCH HEAD, FLEX HEAD, and FLOOD HEAD to combine with a MULTILIGHT BODY CONNECT, each designed for specific work purposes: the combined MULTILIGHT SEARCH CONNECT provides 600 lumen, the MULTILIGHT FLEX CONNECT provides 750 lumen and the MULTILIGHT FLOOD CONNECT provides up to 1500 lumen.

The body of the MULTILIGHT CONNECT is adjustable in an angle of 120°, giving you complete control over your lighting. Additionally, the body is equipped with a new, flexible mounting system that offers a combination of a bracket, a hook, and a magnet in one unit to ensure maximum functionality.

We are confident that MULTILIGHT CONNECT will help the professional users in the industry work more efficiently and effectively. We are looking forward to hearing your feedback on this new product.
