

SCRUBBER DRYERS IN THE HOSPITAL SECTOR

Scrubber dryers are indispensable machines in particular, in the hospital sector.

Scrubber dryers are indispensable machines for cleaning and maintaining work, commercial and industrial environments. In particular, in the hospital sector, these machines guarantee optimal hygiene and a healthy and safe environment for patients and healthcare workers.

Floor Cleaners are **cleaning machines** that combine washing and drying functions in a single solution. Among the main features of these machines, we find:

- **High performance:** thanks to rotating brushes and powerful motors, the floor cleaners guarantee an efficient and deep cleaning of floors, while removing dirt, dusts and residues.
- **Fast drying:** after the washing, the vacuum system does the removal of the water, while guaranteeing the fast drying and reducing the risks of slipping and accidents
- **Ergonomics and ease of use:** the majority of the floor cleaners are equipped with intuitive and adjustable controls to guarantee a comfortable use and adaptable to the needs.
- **Versatility:** floor cleaners can be used on various surfaces, such as floor tiles, linoleum, marble, ecc. This characteristic makes these machines adaptable to different environments and sectors.
