

EYETRON

IMPROVE YOUR WELDING PERFORMANCE!

EYETRON is the new professional welding helmet with **automatic darkening** (ADF) and a **XL viewing area** suitable for all welding and grinding processes thanks to the double dimming scale (DIN 5÷9/9÷13).

VERSATILITY

TIG from > 2 A

MIG-MAG

MMA

GRINDING MODE

Suitable for all types of **TIG (>2A)**, **MIG-MAG** and **MMA** welding processes, it can also be used for **grinding** operations by activating the grinding function.

The **'GRIND'** function blocks the darkening of the mask glass so that grinding operations can be performed safely and securely.

EYETRON

IMPROVE YOUR WELDING PERFORMANCE!

PERFORMANT VISION

It implements the **True Colour** technology for a more realistic colour vision, sharper contrasts and greater image definition for more precise welding and less eye fatigue.

The **XL viewing area** ensures maximum visibility even in the most difficult working positions.

The maximum sharpness of the working area (**optical class 1/1/1/1**) and the speed of darkening (**4 sensors**) make this mask a safe and quality working tool.

PROTECTION & SAFETY

5÷9 9÷13

SHADE RANGE

SHADE 5

SHADE 13

It is possible to adjust:

- The darkening degree depending on the workpiece and its sensitivity, thanks to the double adjustment scale (DIN 5÷9/9÷13).
- The transition delay time from the dark to the light state, after the interruption of the arc, depending on the brightness of the workpiece.

COMFORT

Lightweight and comfortable, this mask is suitable for the professional looking for high performance and maximum protection.

Easy to adjust thanks to the external knobs.
