

## TRIBE 9-13

### THE NEW AUTOMATIC MASK

Now available is **Tribe 9-13**, the new **automatic variable darkening welding helmet** (9-13 DIN) ideal for the welding enthusiast who wants to complete fast work or DIY tasks with maximum protection and safety.

Lightweight and comfortable, Tribe 9-13 is equipped with a **filter (optical class 1/1/1/2)** that darkens when the welding arc strikes and quickly returns to a transparent state when the arc is extinguished, eliminating the need to raise and lower the mask at every work break and thus allowing hands-free operation.

Suitable for all types of **TIG (>2A)**, **MIG-MAG** and **MMA** welding processes, it can also be used for **grinding** operations by activating the grinding function. The **'GRIND'** function blocks the darkening of the mask glass so that grinding operations can be performed safely and securely.

# TRIBE 9-13

## THE NEW AUTOMATIC MASK

**TIG from >5 A**

**MIG-MAG**

**MMA**

With Tribe 9-13 it is possible to weld in MIG, TIG (from >5 A), MMA by adjusting the degree of darkening depending on the welding process used and the amperage.

**GOUNDING**

It can be used for **grinding and sharpening** work by activating the appropriate function.

Replacement glasses are also available:

- external 95x115,5mm (cod. 804312)
- internal 41,5x96mm (cod. 804411)

Tribe 9-13 is part of the wide range of welding masks and PPE offered by Telwin.
