

WELDWEAR – FLAME-RETARDANT WELDING HOOD

Maximum safety and comfort during welding operations.

The flame retardant welding hood is an essential PPE to ensure the welder's maximum safety and comfort during welding operations.

The clothing worn in addition to the adequate protective equipment (welder's helmet, protective jacket, etc.) offers further protection to the head, neck and the upper shoulders in the event of:

- sparks generated by the welding process;
- mechanical risks and thermal risks generated by the welding process.

Made from high-quality (100%) flame-retardant cotton, it offers protection from heat and sparks and ensures a comfortable fit and ample freedom of movement.

FEATURES:

- **Resistant:** 100% fireproof cotton (260 GSM) with Kevlar™ thread seams, designed to withstand sparks and high temperatures;
- **Safe:** protection for head, neck, chest and shoulders;
- **Practical:** fastening strap of mask headgear.
