

GLUE REPAIR DELUXE:

Telwin Glue Repair

GLUE REPAIR DELUXE is the professional glue repair system designed specifically for repairing damage to exterior sheet metal.

The content of this solution includes a wide variety of tools all designed to meet the needs of the various stages of repair using glue: suction cups in various shapes and sizes;

two types of glue (Elastic and Strong) used depending on the type of damage to be repaired;

lithium battery hot melt glue gun with adjustable temperature; and then, everything you need for traction and working including a puller hammer, compact traction puller, aluminium hammer with interchangeable heads and super glue remover spray.

GLUE REPAIR DELUXE:

Telwin Glue Repair

GLUE REPAIR DELUXE GLUE REPAIR DELUXE comes in a sturdy plastic case designed for order and storage after each use of the various tools, as well as their easy transport in any area of the bodyshop.

GLUE REPAIR DELUXE completes Telwin's offer dedicated to Smart Repair by creating complete and efficient solutions with patented products such as the Battery Puller and the T-Raction 250 puller arm.

The aim is clear: to provide industry professionals with tools that increase productivity, reduce consumption and significantly reduce working time and costs, while always focusing on energy savings
